As of 29th May 2017, the SIT Gas Controls new address and contact details will be:

SIT Gas Controls Pty Ltd
10 Treforest Drive
Clayton Victoria 3168

Phone +61 3 9538 9900
Fax +61 3 9543 3873

Gas Speak 2017 - National Gallery, Canberra 11–13 September 2017

The Australian Gas Industry Trust (AGIT) will be conducting the Gas Speak Colloquium for 2017 at The National Portrait Gallery, Canberra from Monday 11 September to Wednesday 13 September 2017.

The program provides for young people who work in our industry to prepare and present a paper on a gas related subject of their choice.

The event continues the tradition of successful Gas Speak events held since 1982. This is an extremely well regarded educational event and GAMAA members are encouraged to nominate young up-and-coming staff members to apply.

Nominations close Friday 7 July 2017. [Access nomination form and full content here](#)

The Future of Gas Networks

Australian Gas Networks (AGN) is inviting gas industry stakeholders to join them for a special event, featuring Dan Sadler, Northern Gas Networks (UK), and Project Lead on the exciting Leeds City Gate H21 project.

The Leeds H21 work is a ground-breaking study looking at the economics and practicalities of converting an entire city network (Leeds in the UK) from natural gas to zero carbon hydrogen.

This event will provide an important opportunity to have an informed discussion about the future of gas networks in general and more specifically, the benefits and challenges associated with hydrogen conversion.

When: Friday 30 June 2017 | 10.30am – 12.00 noon (ACST – SA time)

Where: Offices of AGN, Level 6, 400 King William Street, Adelaide

Teleconference: Dial in details will be available for those unable to attend in person.

RSVP: Please RSVP your attendance to Anna Mitchell via email haveyoursay@agnl.com.au by Wednesday 14 June 2017
