Happy Easter Break

On behalf of the GAMAA Executive I would like to wish all our members a safe hopefully restful break over the Easter period. We hope that whatever your circumstance, you are able to relax and reflect.

GAMAA Technical Committee Meeting - 21 April 2020

A good number of members have accepted the calendar invite I sent for this meeting but as you can imagine with the current state of play with COVID-19 we are now restricted in holding a gathering of this size.

Ross Jamieson and I are currently working through various options for holding this meeting using electronic media (Skype, Microsoft Teams, Zoom or others) and once a viable solution has been agreed I will communicate (send a new calendar invite) with the new arrangements so we can continue with this meeting.

Please email jon.onley@aigroup.com.au if you have any questions.

Future Fuels CRC – New Website

The FF CRC has rolled out of our new public website at www.futurefuelscrc.com

As previously mentioned, GAMAA is actively participating in a number of research projects and the work being undertaken is being headed up by Leon Bogers GAMAA Executive Councillor and Vice President and Ross Jamieson our GAMAA President.
