Future Fuels CRC Webinar Invitation

Gas appliances compatibility with Hydrogen Blends

10:30am to 11.45am Tuesday 25 August (AEST)

Understanding the capability of Australia’s installed gas appliances to operate with Hydrogen/Natural Gas blends is an important achievement for Future Fuels CRC and our participants. Both our research projects have now been successfully delivered:

RP1.4-01 Future Fuels end-use - Type A appliances Test Program
(Type A includes Domestic and light commercial type appliances)

RP1.4-02 Future Fuels end-use - Type B and industrial equipment
(Type B includes industrial and heavy appliances with gas consumption in excess of 10MJ/h)

FF CRC has created a new webinar opportunity for all our participants to learn more about this important research.

The Presenters and Q&A panel will include:

- Peter Ashman** University of Adelaide
- Neil Smith** University of Adelaide
- Leon Bogers** GAMAA / Rinnai
- Enzo Alfonsetti** Energy Safe Victoria
- Pavel Panek** University of Melbourne
- Josh Wickham** GPA Engineering
- Alistair Wardrope** Jemena

This Webinar is only open to participating organisations of Future Fuels CRC, so please register at:
