

Standards Australia Proposal to revise AS 4032.1

GAMAA has received a Project Proposal to revise the standard AS 4032.1 *Water Supply – Valves for the control of heated water supply temperatures. Part 1: Thermostatic Mixing valves – Materials, design and performance requirements.*

The aim of this revision is to remove the limitation within the Scope from only being metallic bodied valves but to include plastic bodied valves as well and add performance and durability requirements applicable to plastic materials for valve bodies.

GAMAA is proposing to support this project. If you do not support this position please advise ross.jamieson@sitgas.com.au by COB 8th September with your reasons. A copy of the proposal is available on request.

Standards Australia – Vacant Committee positions

As members would be aware GAMAA is a nominating organisation to Standards Australia by providing technical experts to assist in the development of Australian Standards.

The list below identifies the individuals who represent the interests of the GAMAA community in the drafting process.

There are a number of vacancies that need to be filled and there are opportunities to be become involved in the process and learn from some of the more experienced representatives. Being involved is an excellent way to understand the Standards process and to influence the right outcomes, it is a role where you can learn on the job.

If you are interested in either filling a vacancy or become involved in the process please contact ross.jamieson@sitgas.com.au
